

Provincial Totals
 Referral Rate of Newly Diagnosed Individuals per 1,000 Population
 1993/94 to 2016/17

The top number in the stacked bar represents the referral rate of new IFG and IFG & IGT cases per 1,000 population.
 The lower number represents the referral rate of new diabetes cases minus the IFG diagnoses* (100 in 2016/17; 147 in 2015/16; 171 in 2014/15; 214 in 2013/14; 284 in 2012/13) and the IFG & IGT diagnoses** (19 in 2016/17; 27 in 2015/16; 31 in 2014/15; 50 in 2013/14; 54 in 2012/13).

* The IFG diagnoses first appeared in the 1999/00 fiscal year.

** The IFG & IGT diagnoses first appeared in the 2004/05 fiscal year.

Expected incidence (diabetes in general) according to American data is 2.8 per 1,000 population. American Diabetes Association.
